

NOVELTIES

Our plant breeding department is pleased to announce that the following flower seed developments are ready for introduction this year:

F1 Can-Can

The first F1 hybrid Extra Early Dwarf Giants of California Petunia ever developed. Unexcelled for bedding plant sales in flats or pots, bearing huge blooms. Available in mixture of colors and separate colors of orchid, rose and rose and white bicolor.

Superjack

A basic refinement in one of the most popular American Marigolds on today's market, in a full range of colors, far earlier and about six inches shorter than any strain heretofore offered that can be described as Dwarf Sunset Giants, and we feel confident will replace all others.

Early Bird

Unquestionably the earliest and most dwarf Unwin type Dahlia to be introduced. Its full range of color in double and semi-double blooms equals the better Unwin types on the market, but plants are super dwarf, being half as tall. Outstanding for flat and pot work, extremely suitable for bed and border work. Good stem length for cutting.

Use this catalog as an order form. We will send you another. Additional copies are available on request.

TERMS—these prices effective on all sales immediately, minimum charge per item 50c. Listed price rate applies to all quantities.

All seeds are quoted f.o.b. Guadalupe, California, 60 days acceptance net, less 1% cash thirty days. Invoices payable in U. S. dollars. All overdue accounts subject to sight draft and ½% interest charge per month. Bags and containers shall be charged at cost and are not returnable. No charge will be made for paper inside containers.

We warrant, to the extent of the purchase price, that seeds or bulbs sold are as described on the container, within recognized tolerances. We give no other or further warranty, expressed or implied.

We reserve the right to change prices at any time without further notice. If, due to crop outcome, pro rata delivery be necessary, orders shall be filled on this basis. Crop failure or any other cause beyond our control releases us entirely from delivery.

PAYMENT—should be directed through the Bank of America, Santa Maria, California branch.

INSURANCE—will be covered by us and charged at cost, unless otherwise instructed.

We are wholesale growers and serve only the seed trade. We do not sell at retail, nor to nurserymen and florists.

COMPLAINTS—on outward appearance and on the weight of seed must be lodged within six weeks of date of invoice; those on germination within ten weeks; those on trueness of strain by the end of first normal blooming season after delivery.

FIRM NAME_____

ADDRESS_____

Special Instructions_____

Petunia F1 Can-Can

PHOTOGRAPHS—we have a modernized collection of black and white photographs, 4x5 size glossy prints, of all listings at a charge of \$1.00 each. Color transparencies in 4x5 size are available at \$5.00 each of many items in our listings, and are suitable for the production of high quality four-color plates. 35 mm transparencies suitable for slide projection are available at 50c each. We have a loan collection available free of charge of over one hundred fifty slides, advance reservations are requested for this collection.

TRIAL SAMPLES—of all items in our listing are available on request. We are pleased to provide them as we welcome competitive comparison trials.

THE SANTA MARIA VALLEY—is our principal growing area. Our main office is located at Fourth & Obispo Streets, Guadalupe, California, TELEPHONE GUADALUPE 2371, cable address "WALLER, GUADALUPE."

WF—indicates those varieties introduced, bred and developed by the Waller Flowerseed Company or so highly rebred from original strains that they are to be considered outstanding in their class.

AAS—indicates those varieties introduced which have won All-American Selection awards.

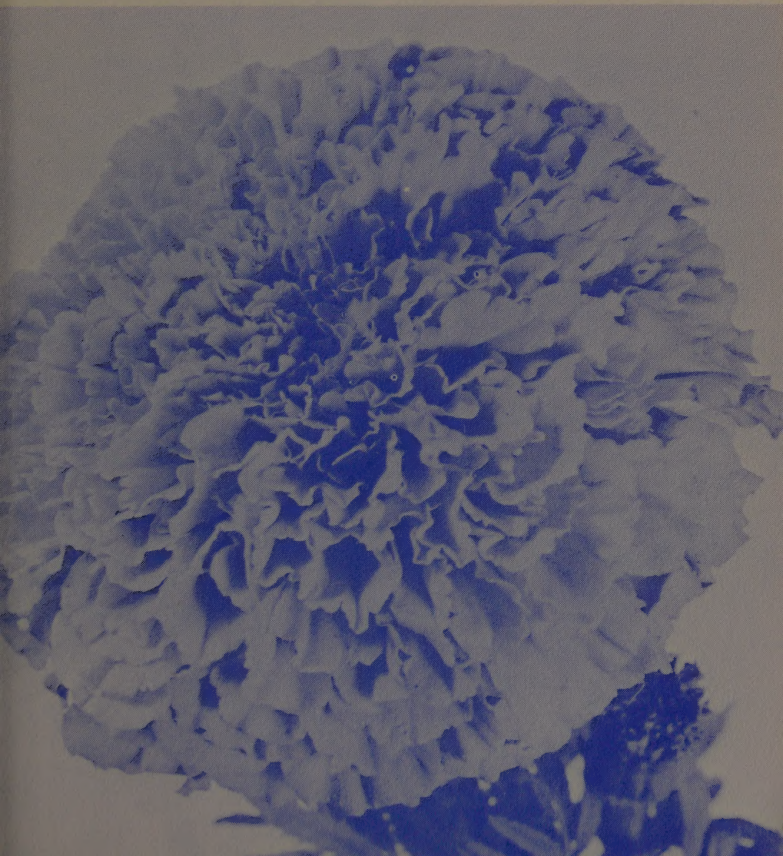

HEIGHTS—as indicated are approximate under normal growing conditions in our testing grounds. Heights normally will remain relative in other areas, and dwarfness can be considered a sign of earliness.

COLOR—descriptions have also been greatly revised, and are now relative to each other within each group, and with special regard to Sweet Peas can be compared quite exactly between groups.

SEED COUNT—per ounce are available on the last pages, and are approximate varying with conditions of each production season, but may be used as a guide.

4 — POINT — 4

PROGRAM

FOR FLOWERSEEDS

Total dehumidification of our plant was completed during last July, all storage, packaging and order filling operations are under controlled minimum moisture conditions.

1. AREA CONTROL of specific seeds for different minimum moisture levels for proper preservation of harvest fresh germination. Even orders shipped in cloth or paper containers assure you of harvest fresh seed, at any time of the year.

2. FLOWER FRESH pressure lid cans of all varieties are available for shipment to you for maximum protection of germination, insect, rodent, fire and water proof. Ideal for situations where government agricultural inspection is necessary. Our charge for these cans is 10% of the purchase price, thus covering shrinkage and cost of cans.

3. SAFETY SEAL* metalized plastic bags are now available for ease of handling. A brand new superior packaging material developed for moisture resistance and use in the atomic energy program. Tested moisture safe by University Laboratories for seed preservation. Labels and packages do not bear our name. Our pressure labels can easily be marked by you with your own code or lot numbers. Cost is minimum, and as follows, includes cost of processing:

Typical quantities for our 5½x10" bag costing 20c are approximately 1 lb. of a dense seed such as Stocks.

Unless specified, largest size Safety Seal bags shall be used. We will, however, on order effect a breakdown up to four units of any particular order for an item. For example, we will put up a 1 lb. order in either two ½ lb. or four ¼ lb. bags. We do not combine our catalog pricing with packaging and processing costs, but quote them separately.

All highly perishable and expensive items are only packed in SAFETY SEAL*. However, we ask that you please specify all seed that you definitely wish in Safety Seal packages as this will facilitate and hasten your order.

4. GERMINATION reporting on invoice marks a milestone in the flower seed business. We shall not withhold shipment for germination reports that may be late due to laboratory delays, but will follow-up these items as rapidly as possible with a complete report.

The above POINT 4 program is the most complete, from the standpoint of dry conditioned seeds, and germination that has ever been offered by a flower seed grower. It is based upon many years research and actual practice, and is one further reason why you do receive greater flexibility of packaging, and greater quality per dollar from WALLER than any other source. We have been, and are, with our POINT 4 program moving further into the position of leader in dry conditioned seed for known and better germination, at all times.

* Used as a Trade-mark.

_____	Perezii - deep blue clusters 3 ft.	16.00 _____

Here at Wallers, we spend well over 10% of our gross income on research dedicated to the development of new varieties, and the maintenance of high quality in standard varieties. We have always followed the policy of a low advertising budget, and a very high research and maintenance budget for the production of highest quality seed possible.
